How many kits do you have with only one, maybe two, shadows used to the bottom? I have about 10.

ISS Intelligent Skin Sense kits are smarter: All 4 Green Envy makeup kits have 4 shadows, 2 blushes, and a foundation you choose from 5 options, based on your skin tone: Oatmeal, Cool Beige, Canvas, Cashmere, or Iced Coffee.

The color combinations are all keepers so you'll actually use up the kit evenly I'm betting. But you can refill single shades as needed. They have a natural SPF of 17; plus, they're mineral based (hence the "green" moniker), so you can even sleep in them if you want to -- or do so unwittingly.
